Please note: Whilst we always try to ensure availability of all items on this price list, and for certain less commonly used pump and motor options a minimum order quantity and / or longer lead time may apply as dictated by our motor manufacturers. If in doubt please contact us to discuss. Our standard Santoprene tubing is Norprene A60G, although we reserve the right to use alternative brands if necessary. For food grade requirements ensure that the first three digits of the pump part number are followed by a 'F', which indicates food grade. We cannot advise on chemical compatibility of tubing except that we can check on proprietary chemical resistance charts. The customer must run their own tests to assess suitability of our pumps in their application.

NB:- DC motor RPM varies with load. Motor voltages stated are nominal, most DC motors can be run at the stated voltage minus 50% & plus 25%. Consult our technical department for assistance.

All the above motors are fitted with carbon brushes which are a wearing part. The estimate life of brushes when pumping under minimal load at the stated voltage is approx 2000 hours, but many factors affect this life. Consult our technical department for advise.

NB:- These motors may require filtering to meet EMC regulations.

Mounting brackets

						Price
L	L shaped					£4.65
F	Flat					£3.30
K	Kit (no bracket)					

Add above code as suffix to pump model number to select chosen bracket. Eg 810-143-230-250/2-L would have an L shaped bracket. Where no suffix is shown the flat plate will be supplied.
